Connecting a subwoofer to the Ascensioncube

To Line-out or earphone jack on CD Player

Radio Shack
42-2570 Y-adapter

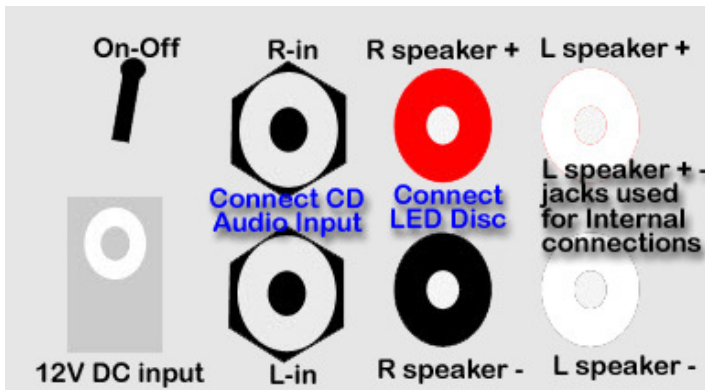

To subwoofer audio input lead (green)

To CD Player or Y-adapter above if adding a subwoofer

Connect to right and left input on Ascensioncube

USA Ascensioncube package contains:

- Power Supply for Ascensioncube amplifier
- AC power cord for Ascensioncube power supply (110/240 Power supply can be switched by replacing the adapter cord)
- Nylon Rod (basic model)
- Nylon Rod and 5 in 1 Inert Gas Insert (upgrade)
- All 5 Octave Wave CD's
- Peace Project CD
- Microphone
- LED Body Disc
- Portable CD Player
- 4.5VDC CD Power Supply
- 274-889 1/4" to 1/8" Y-Adapter (accepts two 1/4" mono plugs Fits 1/8" mono jack)
- 274-374 1/8" Stereo Male to 1/8" Mono Female
- 42-2351 3-FT Stereo Audio Cable
- 42-2570 Y-Adapter (splits audio between subwoofer and Cube)

The internal components are already connected to the "Left Out" banana plugs. Do not plug in any other components to these jacks.

Connect the LED Disc Pad to the "Right Speaker" banana jacks. The LED Disc Pad can be placed on various points on the body for further stimulation. We recommend placing the LED Disc Pad in the naval (LED'S In) while enjoying your personal program.

Connect the 3' audio cables from the CD player "LINE OUT" to R-in and L-in on the Ascensioncube. Plug in the 12V DC power supply. Turn the Power on. **Do not use the earphones. You cannot plug in the earphones and then plug the Ascensioncube into the Line-out. CD player output can only supply audio to one or the other. (earphone jack or Line-out).**

Adjust the dial on the Ascensioncube so the LED's are flashing whenever the CD is playing. The quartz tube should glow red. Remember, the power is in the coherent energy created by the coil. If you purchased the Inert Gas Insert, remove the crystal disc, take out the nylon rod and carefully insert the glass insert.

Contact your VAHS Operator to create your personal frequency water. If you purchased your Ascensioncube on-line you can use the voice recorder on www.toneup.net to create your personal frequency water, **the first one is free.**
